

Wedding Photo Albums And Books

- **Peter's preferred manufacturer** is Graphistudio. It invented the flushmount wedding album and to paraphrase the iconic advert is "probably the best album manufacturer in the World". It is based at the gorgeous old Castle Ceconi just north of Venice and naturally your album will have all the elegance and style you would expect from a prestigious Italian manufacturer
- **Many clients** now complete their choices of photos, design preferences, album covers etc online. Leather is the most popular cover material by far and the grid in the website Albums Page illustrates the most popular leather colour choices. Tap any photo in the grid to browse lots more photos options and details of each choice. Browse the detailed descriptions, photos, and sample layouts. You can also download a Covers Brochure (PDF) and this Albums Price List (PDF)
- **Every album and book design is individually completed** by Peter in consultation with you, then amended and approved by you

How To Order

- **Most clients find it difficult to visualise an album design** from their own galleries. Peter suggests you make a list of your favourite images using the first three digits of each filename. He will select others using his art and design skills to tell the story of your day. He will ask you for your general design preferences – you could browse the online sample albums to get some ideas
- **Submit your list** with this document
- If you require an album designed with photo files supplied by you rather than shot by Ashton Lamont please pay 50% of the total cost up front. This is the design fee and is not refundable in any circumstances. Please ensure that your files are of sufficient size and quality – Peter can check these files before you commit. Please supply the files, preferably unedited and in the “RAW” format, on a disc or USB drive, or via an online sharing service e.g. Dropbox
- **Peter will design your album layout.** Review the design via your page on the Ashton Lamont website. Request any minor edits or confirm your approval by email. Major edits may incur additional charges. Submit the remaining 50% of the cost. Then your album will be manufactured
- **Please be aware** that album design and manufacture is a complex process and can take a lengthy period depending partly on the time of year. Peter can give you updates but normally please allow around six weeks for delivery from the point where you approve the design and pay your final instalment
- **Specify Your Requirements:** e.g. album type and size, album cover, number of pages / sides, type of photo paper, any other requests and options
